Summary

An Informatics Engineering student in their 8th semester at STIKOM Cipta Karya Informatika Jakarta, deeply interested in the evolving world of technology, with a particular focus on mobile application development using the Flutter framework and website development through low-code platforms such as WordPress and Elementor. Possessing a strong willingness to learn new technological advancements, I also bring three years of experience working as an IT teacher at IDN Boarding School Bogor.

Work Experiences

IT Coordinator & IT Teacher • SMP IDN Boarding School Sentul

July 2023 - Present

Since 2023, I have been working as an IT Coordinator and IT Teacher at SMP IDN Sentul. In my teaching role, I deliver practical and engaging lessons on topics such as game development using Scratch and Buildbox, website creation using WordPress and Elementor, animation design with Canva, and 3D modeling using Spline. My goal is to introduce students to real-world tools and creative thinking through technology.

As the IT Coordinator, I am responsible for ensuring that students achieve their technology-related graduation standards (SKL) before the set deadlines. I also oversee the availability and functionality of educational tools and infrastructure to support the learning environment. Additionally, I participate in regular coordination meetings with IT Coordinators from other branches to align strategies, share best practices, and maintain consistency across regions.

Web Developer & UI Designer • MDT Al-Ishlah

April 2025

I also work remotely as a solo Web Developer and UI Designer for the MDT website project. In this role, I am fully responsible for both the design and development of the website. I use Figma to create clean and intuitive user interface designs, ensuring a smooth and consistent user experience. Once the design phase is complete, I implement the website using WordPress with the help of Elementor, allowing for flexible, responsive, and visually appealing web development. This role allows me to combine creativity and technical skills to deliver a complete and professional website solution independently.

Educations

St Ilmu Komputer Cipta Karya Informatika Jakarta

Informatics Engineering

2021 - Present

MA Al-Ishlah Bobos (Graduated)

Science

2017 - 2020
